Jack Curtin

Full Stack Software Developer

Chicago, IL 60647 (803) 429-5387 jackcurtin94@gmail.com

PROJECTS

Next Groove

- Created a RESTful API with full CRUD operations using Java Springboot MVC with Postgres to store a user's record collection.
- Built SPA front-end with Angular and Angular Material
- Developed an algorithm to determine what album should be played next based on aggregate ratings of their current selection
- Utilized Pivotal Tracker to manage sprints and user stories
- Built wireframes / ERD diagrams to plan app infrastructure

New Age Tic-Tac-Toe

- Built a complete web application using Javascript, HTML, and CSS
- Integrated animation libraries and custom sound effects to achieve the concept of a therapeutic, relaxing game
- Responsive design allows game to work on mobile devices

Mock Wayfarer

- Fully functional Angular front-end SPA where users can create posts about their travel experiences in individual cities
- Posts are sorted by their timestamp and can be filtered through keyword searches within each city component

EDUCATION

General Assembly Software Engineering Immersive

March 2021 - May 2021

Engaged with a fast-paced, 12 week course in full stack development, learning the ins and outs of building complete web applications using Angular and Java Spring Framework. 480+ hours of coursework, including pair-programming labs, homework, and 3 cumulative projects.

Loyola University Chicago — Film and Digital Media | B.A.

August 2013 - May 2017

WORK EXPERIENCE

Move-Tastic, Chicago, IL — *IT Consultant*

April 2020 - February 2021

Maintained tablets and other devices regularly used in the field using MDM software. Tracked and optimized computer, printer, and network configuration for the entire office.

SUMMARY

Full Stack Developer with a diverse background and an eagerness to learn. With many different professional and personal creative pursuits, I have proven I am adaptable to whatever my current position requires.
